1.2.3 Identify right angles in the environment:

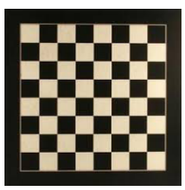

Ram is trying to cut a piece of wood in rectangular shape from a wooden board. Ram used a tool to cut the sides of the rectangle. This device is called as set square.

We can see two set square in our Geometry Box. Both the set squares have 90° measurement.

Examples:

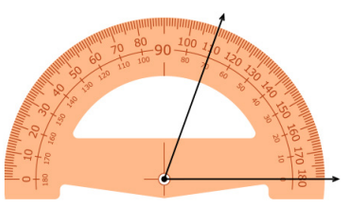

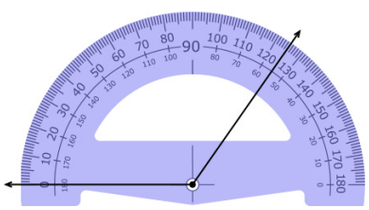

Try this

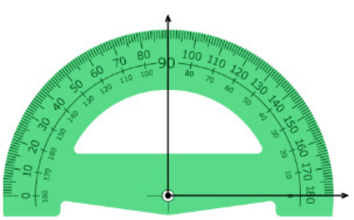

Draw 5 objects with right angle:

Activity

1. Classify and write the angles as acute, obtuse and right angle.

2. Classify the following angles (acute angle, obtuse angle and right angle)

30°, 45°, 60°, 90°, 120°, 130°, 170°, 75°
