They finished their purchase and returned back home.

Ananthan asked his father 'how much did you spend for our dresses?

His father said, "Cost of dresses for gents is ₹ 25050, and for ladies is ₹ 47025 and for kids ₹ 7125, and also cost of bride and groom dresses are 17500, now can you tell the total amount.

Ananthan took a paper and pen, he wrote all the amounts one by one according to their place values.

For gents	-	₹ 25050
For ladies	-	₹ 47025
Kids	-	₹ 7125
Groom and bride	+ -	₹ 17500
		₹ 96700

Check whether, the above total amount is correct or not.

Yes, ananthan did correct, see the cost of kids, `7125, There is a vacant place in ten thousand's place. So Anandi wrote down the numbers one by one according to the place value. We learnt about place values of the numbers, Now we are going to add numbers. Write them one by one as shown below.

137462 + 4005 + 38 + 56734.

L	T.Th	Th	H	T	O
1	3	7	4	6	2
		4	0	0	5
				3	8
	5	6	7	3	4
1	9	8	2	3	9

Step 1: Start by adding the ones. We have 19 ones in ones place.

Step 2: We must regrouping 19 ones to 1 ten and 9 ones.

Step 3: Now we can put 1 ten with ten and write 9 in the ones place.

similarly we shall add the digits in other places

Arrange all the given numbers according to their place value.

We can do all the addition problems in this manner.
