❖ Rice

Rice is a type of grass. It is cultivated worldwide after sugarcane and maize. Large parts of the world's human population especially people in Asia have this as their main food. Ninety percent of the world's rice production is in Asia. White rice contains few essential nutrients. Brown rice is a whole grain that contains the fibrous bran. Brown rice is usually considered much healthier than white rice. Rice idly, idiappam and rice aval (flattened rice) are the food items prepared from rice.

❖ Millets

Millets are a group of small seeded grasses. They are widely grown around the world as cereal crops for fodder and human food. It helps in weight loss. It is rich in fibre. Some of the millets are sorghum, foxtail millet, finger millet, pearl millet, barnyard millet, kodo millet and little millet.

V. Household Things

These are the products that we use in our houses. The things that are found in our houses permanently are called household things. House hold things are furniture, kitchenware, clothes, towels, beddings, boots and electronic goods etc.

Household things used in the olden days
