Archaeological excavations

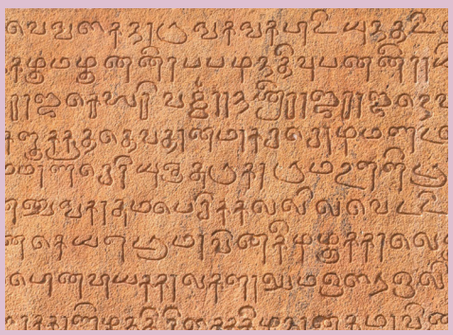

Coins, potsherds, metal objects and so on are dug out from **Archaeological sites.** Such objects are preserved in the **museum.** In Tamilnadu, **Athichanallur, Arikkamedu** and **Keeladi** are such sites where the objects used by the people of the past are excavated. Still research is going on in these sites.

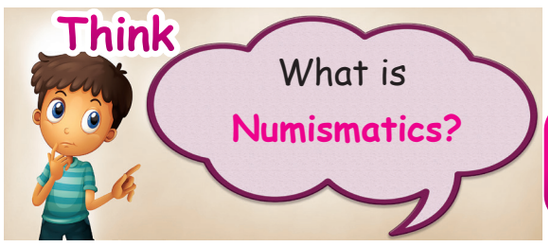

If you come across any old, traditional objects of historical value try to **collect and preserve** them.

Scripts inscribed about a king's rule, people or society on rocks and walls are called inscriptions. Usually they are found on temple walls.

Glossary

Artefacts : Articles made by early humans
