Do you know?

The result of the sum of two triangular consecutive numbers is a square number.

1 + 3 = 4	
3 + 6 = 9	
6 + 10 = 16	

3.2.2 Relationship between consecutive square numbers and odd numbers.

We have already learnt about the relationship between square numbers and triangular numbers.

Now we are going to know the relationship between consecutive square numbers and odd numbers.

When we add the consecutive odd numbers from 1, we will get the square numbers.

1	=	1
1 + 3	=	4
1 + 3 + 5	=	9
1 + 3 + 5 + 7	=	16
1 + 3 + 5 + 7 + 9	=	25

Square numbers

Note:

1 is the common number among square numbers and triangular numbers.
