

The rocky-inner planets are Mercury, Venus, Earth and Mars. They are called terrestrial planets. The outer planets are gaseous planets. They are Jupiter, Saturn, Uranus and Neptune. The frozen planets are Uranus and Neptune.

Imayan : Dad..... Where is our **Earth** in the **Solar System?**

Father : The Earth is the **third planet** from the sun and the **fifth largest** in Solar System.

Imayan : It is said that the Earth is rotating itself and at the same time revolving around the sun. Is it true?

Father : Yes, Earth has **two movements**. They are:

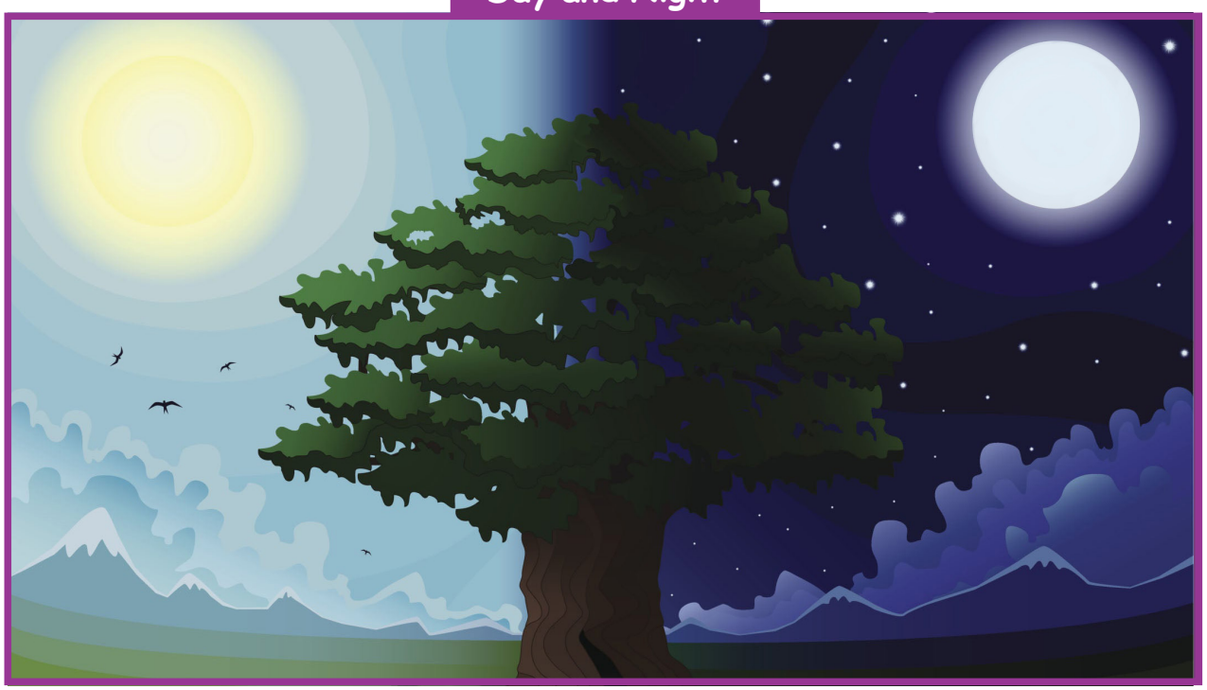

1. **Rotation**
2. **Revolution**

Rotation

The movement of the Earth on its axis is called **rotation** of the Earth. **Day and night** are caused due to the Earth's rotation.

Day and Night
