4) Clouds

Clouds are large collection of very tiny droplets of water . These are divided into four types on the basis of appearance and height. They are:

- Cirrus clouds
- Stratus clouds
- Cumulus clouds
- Nimbus clouds

Cirrus Cloud

Cirrus cloud appears like a silver grey fish at a very high altitude in the sky. These may not give rain.

Cirrus Cloud

Stratus Cloud

Stratus Cloud

Stratus cloud is grey in colour and are spreadout. They may give small shower.

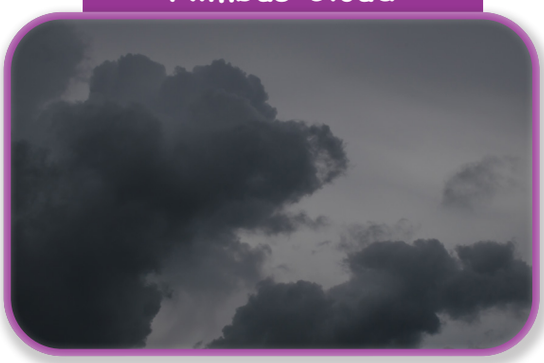

Cumulus Cloud

Cumulus cloud looks like a puffy white cotton and gives convectional rainfall. These clouds are associated with rainfall, lightning and thunder.

Cumulus Cloud

Nimbus Cloud

Nimbus Cloud

Nimbus cloud appears as dark or grey in colour. It gives heavy rainfall. It is called vertical or rain clouds.
