Orographic Rainfall

When the moisture laden winds from the sea rises as it moves over a mountain range, it becomes cool and causes heavy rainfall. The opposite side of the mountain is called Leeward side. It receives very little rainfall.

Cyclonic Rainfall

The warm air from the hot area is heated and moves upwards. Hence a low pressure area is developed and it attracts air from high pressure area. Owing to Earth's rotation a circular motion of winds develop. It gets cooled and brings heavy rainfall.

Rain Water Harvesting

Rain water harvesting is a technique of collection and storage of rainwater into natural reservoirs or tanks, or the infiltration of surface water into subsurface aquifers (before it is lost as surface runoff). One method of rainwater harvesting is **Rooftop Harvesting.**

Glossary

Condensation : Process of gas changing to liquid
Reservoir : Large lake
Vegetation : Plant

Recap

- Biosphere is the combination of lithosphere, hydrosphere and atmosphere that can support life.
- Climate is the average weather condition of a vast area over more than 30 years.
